BRAND STATEMENT

Both in textile promotion and in corporate fashion wear **JAMES & NICHOLSON** and **myrtle beach** are meanwhile among the best-known and most popular brands. The product diversity of the two product lines is unparalleled and is expanded every year by around 40 fashionable novelties. In the fields of sports, leisure, business and work there is hardly any top or headgear which is not included in the diverse product line.

JAMES & NICHOLSON stands for functional sportswear for almost every sport, for trendy leisurewear and jackets as well as for classic business wear and sturdy workwear. For all everyday situations JAMES & NICHOLSON offers suitable clothing for ladies and men. Most basics are available in almost 40 colours as well as in outsizes up to 6XL.

Fashionable and functional headwear as well as trendy accessories, which can be combined very well with the JAMES & NICHOLSON collection, that is what myrtle beach stands for. The wide range of cap shapes and cap designs is unique and at the same time innovative, for a few of the products of myrtle beach are prize-winning. In recent years the Promotional Gift Award has been won several times by clever cap inventions which have definitely enriched the promotional market. The headwear brand is extended by trendy scarfs, gloves and the large spa collection, which offers terry products for sports and the catering trade in more than 20 colours.

The storage capacity of the brands is 20 million pieces, 98% of which are always available. Extremely short delivery times and a smooth handling of direct shipment are a great advantage JAMES & NICHOLSON and myrtle beach offer their customers. Service takes top priority – in day-to-day business the focus is always on the customer. That is why the quality of the product lines is the most important thing of the company philosophy – from inception to completion and beyond. JAMES & NICHOLSON and myrtle beach are manufactured with social and ecological responsibility. All the textiles are REACH-compliant and manufactured according to Oeko-Tex® Standard 100. Since 1999 social and environmental aspects have been integrated into the company code of conduct. They are submitted to strict controls.

This year too, the new collection radiates a zest for life: always up to the minute in business and therefore trend-, quality- and price-conscious! With JAMES & NICHOLSON and myrtle beach several price levels from low budget to premium will guarantee excellent value for money for the customer.

RESPONSIBILITY

Social Compliance

As members of the, BSCI/Business Social Compliance Initiative' we commit ourselves to implementing the BSCI code of conduct as part of our business relations with our manufacturers and thus to improving the working conditions within our supply chain and to producing our textiles fairly. This includes our clear commitment to the employees' right to freedom of assembly, protection against discrimination, and an adequate remuneration, that is, at least the statutory national minimum wage.

Another central component is the occupational safety regulations. That is how we guarantee that the occupational safety regulations of the ILO (International Labour Organisation) are met. Child labour, forced labour or precarious jobs are not tolerated. Several social compliance departments in the countries of production test all the factories thoroughly and make sure that these conditions are met.

amfori  BSCI
Trade with purpose

Amfori BEPI

By becoming a member of amfori BEPI (Business-Environmental Performance Initiative), we can significantly improve the environmental sustainability of our supply chains. We plan on initiating the introduction process with the strategically most important suppliers for us. To start off with, these suppliers will carry out the amfori BEPI self-assessment, which leads to new approaches to implement measures to improve environmental protection. This is because the starting points for improved product responsibility can only be worked out with our long-term suppliers and implemented in a targeted manner once a critical analysis has been performed. Following on from this, our production facilities will be given additional training measures that provide essential knowledge for practical implementation.

Protection of the Environment

All the products of **myrtle beach** and **JAMES & NICHOLSON** are produced in an environmentally friendly way.

The fabric of this article has been tested for harmful substances and certified acc. to **STANDARD 100 by OEKO-TEX®**

Oeko-tex® Standard 100

This standard guarantees that textile and non-textile product components pose no threat to health.

Quality Standard

The merchandise is regularly tested by certified testing institutes in the countries of production regarding the given parameter. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes the quality is continually controlled.

Adherence to the Reach-Regulations

We assure you that when manufacturing our **myrtle beach** products and **JAMES & NICHOLSON** textiles we meet the obligations of the REACH-regulations.

OCS Standard

When manufacturing garments of **myrtle beach** and **JAMES & NICHOLSON**, the Organic Content Standard is a standard for verifying and tracking the exact content of organically grown materials in a final product. Among other things, the superordinate 'Content Claim Standard' defines with OCS the traceability of merchandise as well as the transparency within the production chain.

Recycled Polyester

Collected plastic bottles are crushed, melted down and spun to yarn again, which is sometimes completely integrated into the production. Thus for producing the workwear cap MB6234 about 3 half-litre bottles are recycled and for the new sport T-shirt JN519 even 25.

WE HAVE BECOME A CLIMATEPARTNER

Climate-neutral catalogue since 2019

Our goal is for both our products and our corporate values to be geared toward sustainability. We therefore want to take responsibility for the emissions resulting from printing our catalogue and give something back to nature. That is why we have been producing a climate-neutral main catalogue since 2019. This means that we compensate for the unavoidable CO₂ emissions caused by printing by supporting climate protection projects.

CO₂ compensation and regional conservation

International climate protection combined with regional commitment

The CO₂ is entirely compensated by one of the following climate protection projects, each of which is certified according to international standards. For each ton of compensated CO₂, a donation will be given to the Bergwaldprojekt (Mountain Forest Project) to co-finance the outreach weeks in the Freiburg Stadtwald (Freiburg City Forest). The project (climatepartner.com/1056) protects more than 97,000 hectares of forest in Pará at the Brazilian Amazon estuary and prevents commercial deforestation. It creates alternative sources of income for local families. The largest Colombian REDD+ project protects 1,150,200 hectares of rainforest and preserves its biodiversity (climatepartner.com/1402). It provides education, healthcare, sanitation facilities, food security and other social services for 16,000 indigenous people.

Clean drinking water

Clean drinking water helps people and the environment in Mozambique

This drinking water project (climatepartner.com/1360) provides around 102,000 inhabitants with access to clean drinking water by repairing and installing wells in the provinces of Tete, Sofala and Manica in Central Mozambique. Providing clean water means that households no longer need to treat water at open fireplaces. This in turn reduces the carbon dioxide emissions produced by the combustion process. It also prevents diseases that can be caused by air pollution from open fireplaces, which often affect women and children in particular.

Carbon neutral

Print product

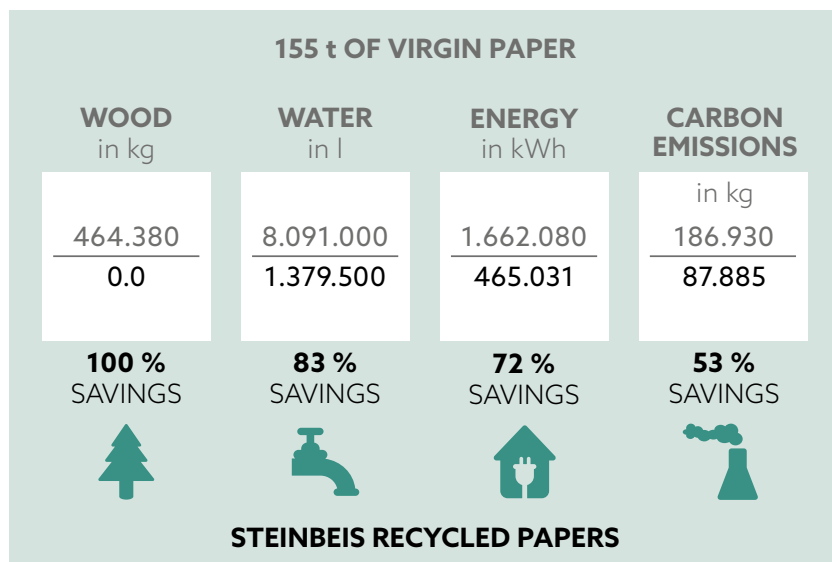

ClimatePartner.com/11061-2210-1003

WE USE RECYCLED PAPER

With each sheet of recycled paper, we improve our ecological footprint and make an important contribution to a more sustainable future. This year, we are producing the inside pages of our main catalogue from 100% recycled paper.

Savings by using Steinbeis recycled paper in our catalogue production

Source: <https://www.stp.de/en/sustainability-calculator>

The data for the paper sustainability calculator used by Steinbeis is based on a study by the Institut für Energie- und Umweltforschung Heidelberg (ifeu – Institute for Energy and Environmental Research Heidelberg), which analysed the production of virgin and recycled paper.

The main findings of the study were as follows: It is clear from all the indicators assessed that recycled paper has a better environmental balance.

A life cycle assessment is a comprehensive analysis of the life cycle of a product. For Steinbeis recycled paper, this includes the extraction and preparation of fibrous raw materials from wastepaper, the auxiliary materials required for this (including for transport), wastepaper treatment and production using environmentally friendly energy sources. All relevant emissions and resources, such as water consumption and energy consumption in paper production, are evaluated as part of the paper's life cycle assessment. The ifeu study found that recycled paper production has the lowest impact on the environment.

SUSTAINABILITY

ORGANIC COTTON

Organic Cotton Collection - Clothes with inner values

Fair, transparent, harmless: The Organic Cotton collection includes a wide range of sustainably produced organic cotton clothing for every fair fashion lover. The Organic Cotton collection by JAMES & NICHOLSON and myrtle beach impresses with a high quality combined with modern cuts and tasteful details.

The naturalness is not only visible but also perceptible. Knowing that the components of the garment are made of sustainably grown cotton and that no genetically modified fibres are used conveys a completely new attitude towards life.

OCS Standard

When manufacturing garments of myrtle beach and JAMES & NICHOLSON, the Organic Content Standard is a standard for verifying and tracking the exact content of organically grown materials in a final product. Among other things, the superordinate 'Content Claim Standard' defines with OCS the traceability of merchandise as well as the transparency within the production chain.

RECYCLED POLYESTER

PET bottles are recycled to create a new fashion

Collected plastic bottles are crushed, melted down and spun to yarn again, which is sometimes completely integrated into the production. Thus for producing the workwear cap MB6234 about 3 half-litre bottles are recycled and for the new sport T-shirt JN519 even 25.

**98% SHIELDING
OF UV-RADIATION**

**UPF
50+**

SUN PROTECTION AT WORK

WORKWEAR WITH CERTIFIED UV-PROTECTION

THE MORE UPF, THE BETTER

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sunscreens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

CORRECTLY ASSESSING THE RISK

PEOPLE WORKING OUTDOORS

Many people work outdoors all day or part of the day. They have a much higher risk of contracting skin cancer than people working indoors. The same goes for leisure activities outdoors. The sun is your constant companion and supplies the vital vitamin D. But a lot of sun also means: headgear, sunscreen and UV-protective clothing.

UVA/UVB-RAYS

UV-radiation is especially strong in the months of April to September; from 11 a.m. to 4 p.m.

THE DANGERS OF UV-RADIATION

UV-RADIATION ALSO EXISTS WHEN THE SUN IS NOT SHINING

ALSO PENETRATES THE CLOUDS

EXISTS INDEPENDENT OF OUTDOOR TEMPERATURE

PENETRATES LOOSE TISSUE

IS REFLECTED BY SURFACES SUCH AS METAL, WATER, CONCRETE

UV-CLOTHING PROVIDES BETTER PROTECTION THAN SUNSCREEN

The best protection against harmful UV-radiation is provided by certified UV-protective clothing. It shields off radiation, does not have to be applied once again like sunscreen and therefore lasts all day. For the parts of the body uncovered by clothes sunscreen with a high sun protection factor and a headgear should be used.

AUSTRALIAN/NEW ZEALAND STANDARD AS/NZS 4399:2017

The best-known and worldwide most common standard is the Australian-New Zealand standard. For checking the UV-protective factor according to AS/NZS 4399:2017, the UV-protection is established on a new and dry textile. For this purpose, the solar spectrum of Melbourne, Australia, is reproduced. Clothing marked with the Australian/New Zealand standard provides protection against UVA- and UVB-radiation of sunlight. A product marked with UPF 50+ according to this standard blocks more than 98% of the harmful UV-rays. The textiles protect the parts of the body covered by them.

TESTED TEXTILE UV-PROTECTION

The LABTECH Prüfungsgesellschaft mbH is officially accredited according to DIN EN ISO/IEC 17025 2005 and based on this standard, they test as an independent laboratory the UV-protective factor of our textiles.

FUNCTIONS

CAPS FOR PRINTING

Caps with this label are ideal for printing and embroidering. The construction of the caps leaves a lot of space so the cap is easy to decorate, with the logo presented to perfection.

BREATHABILITY / PERMEABILITY TO VAPOUR

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

WATER COLUMN

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

TAPED SEAMS

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.

Dirt and water repellent

Microstructure

Teflon® /
BIONIC-FINISH®

Breathable

Membrane

Heat retention

Wind and water resistant

Shell

Lining

Stretch

BIONIC-FINISH®ECO

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH®ECO protects man and nature.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

Without
easy care

With
easy care

Creased shell

Breathable

Microstructure

Drying

Shell

DuPont™ Sorona®

Thermally efficient system

EASY CARE

This special finish makes shirts and blouses especially easy to iron. To preserve this function the textiles should not be overdried in the tumbler and you should avoid using an overheated iron.

DUPONT™ SORONA®

Sorona® renewably sourced fibre delivers superior performance benefits to today's fashion. Fabrics that use Sorona® are very soft, very strong and dry quickly. Sorona® helps fabrics stretch comfortably and retain their shape. And, it is made with plant-based ingredients. DuPont™ Sorona®. Designed for Performance. Derived from Nature.

& FEATURES

LYCRA®

LYCRA® allows the fabric both to stretch significantly and to retain its shape. Fabrics and garments containing Lycra offer exceptional fit, comfort, freedom of movement and wrinkle recovery.

THINSULATE™ INSULATION

The light-weight thermal insulation affords optimum protection against cold despite its minimum thickness. It even keeps you warm in damp or wet conditions. Thinsulate™ INSULATION offers excellent comfort and allows optimum room to move. It is extremely breathable, durable and easy-care.

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

UPF 50+

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sun-screens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

TOPCOOL®

TOPCOOL® polyester fibres perfectly absorb moisture due to their special surface and evacuate it quickly to the outside where it can evaporate. The skin stays comfortably dry and a constant temperature level of the body is maintained.

COOLMAX®

Through the channels of the breathable COOLMAX®-fibre humidity is evacuated extremely fast to the outer layers of the fabric. Thus the body is kept dry. At the same time a natural temperature control of the body is supported.

NON IRON

This special finish makes shirts and blouses iron-free: All you have to do is wash them, dry them and put them on. To preserve this function, these textiles should not be overdried in the tumbler and you should avoid using an overheated iron. If necessary, seams can be ironed at a low temperature.

COOLDRY®

Due to the CoolDry® finish moisture is transported to the outside and creates a comfortable feeling. The textiles dry quickly, are breathable and ideal for all activities.

WASHING (TUB)

The numbers in the tub indicate the maximum washing temperatures which must not be exceeded. The bar below the tub requires a more (mechanical) gentle treatment (e.g. programme for delicate fabrics). It designates washing programmes which are suitable for easy-care and delicate garments. Textiles made of cotton or mixed fibres should be pulled into shape when still wet. We recommend that textiles with prints or embroideries should only be washed on the reverse at a maximum of 40 degrees in order not to impair the quality of the print or embroidery.

Normal washing

Delicate washing

Normal washing

Delicate washing

Normal washing

Delicate washing

Specially delicate washing

Delicate washing

Hand washing

DRY CLEANING (CLEANING DRUM)

The letters are intended for the textile cleaner. They indicate the possible solvents. The bar below the circle requires cleaning under limited mechanical strain, with a limited amount of moisture and at a medium temperature. **Textiles with prints or embroideries should not be dry cleaned.**

Normal clothes

Delicate clothes

Delicate clothes

Delicate clothes

Wet cleaning

Delicate wet cleaning

Special wet cleaning

No dry cleaning possible

IRONING (IRON)

The dots indicate the temperature scale of the irons. Textiles with prints or embroideries should only be ironed on the reverse.

Iron at high temperature (max. 200 degrees)

Iron at medium temperature (max. 150 degrees)

Iron at low temperature (max. 110 degrees)

Do not iron

TUMBLE DRYING (TUMBLE-DRIER)

The dots indicate the drying-grades of the tumble-drier. Textiles with transfer prints must not be tumble-dried.

Tumble dry at normal temperature

Tumble dry at low temperature

Do not tumble dry

BLEACHING (TRIANGLE)

This symbol shows the textile cleaner whether the garment may be bleached or not.

Chlorine bleaching possible

Only oxygen bleaching No chlorine bleaching

Do not bleach
